

Lesson Plan 2: Pollution and How to Prevent It

Grade: 6th Grade

Topic: Pollution and How to Prevent It

Duration: 40 minutes

Location: Indoors (Classroom)

Objectives:

- To introduce types of pollution (air, water, land, noise).
- To improve reading comprehension skills.
- To encourage discussion and critical thinking about environmental problems.

Materials Needed:

- Short reading text about pollution
- Projector/board for visuals
- Worksheet: Matching exercise + comprehension questions
- Markers, paper for posters

Lesson Stages:

1. Introduction (5 minutes)

- Brainstorm: "What is pollution? What causes it?" (List ideas on board)
- Show pictures of polluted environments.

2. Reading Task (10 minutes)

- Students read a short text about types of pollution and their effects.
- Follow with comprehension questions: "What are the causes of water pollution?" "What can we do to reduce air pollution?"

3. Vocabulary Match (5 minutes)

- Match words with definitions: pollution, litter, toxic, environment, prevent, reduce.

4. Group Activity – Mini Poster (15 minutes)

- In small groups, students create a mini-poster titled "Say NO to Pollution!"
- Include 3 causes and 3 ways to prevent it.
- Present to the class briefly.

5. Wrap-up (5 minutes)

- Each student says one way they will help the environment this week.

Extension/Homework:

- Write a short paragraph: "If I were the mayor, how would I fight pollution in my town?"
